# Gyeongju Oreung Royal Tombs

Historic Site No. 172

The royal tombs, located in the southwestern part of Gyeongju city, consist of four earthen mounds and one round grave. Samguk Sagi (History of the Three Kingdoms) describes that five royal tombs includes four kings—King Park Hyeokgeose (founder of the Silla Kingdom), King Namhae (2nd king), King Yuri (3rd king), and King Pasa (5th king)—and one Queen Aryeong (wife of King Park Hyeokgeose). According to Samguk Yusa (Memorabilia of the Three Kingdoms), King Park Hyeokgeose ascended to heaven after ruling for 62 years, and, seven days later, his body, torn into five pieces, fell down from heaven, at which time his queen died. As people tried to bury the five pieces of the king's body in a tomb, a large serpent appeared and prevented from doing so. Thus, the people had to bury the royal remains in five separate tombs, from which the tombs was called Oreung or Sareung.
